

HEALTH NETWORK ONE

A Value-Based Approach to Specialty Management

Specialty care is one of the fastest growing segments of healthcare spend, and one of the most challenging to manage. With over 30 years of experience, **Health Network One (HN1)** is a value-based specialty management company that partners with health plans to actively manage high-impact specialties, including eye care, dermatology, sleep, and therapy. By aligning networks, provider reimbursement, and clinical programs, HN1 reduces administrative burden and creates predictable costs, measurable results, and better member experiences.

We deliver up to 30% clinical and administrative savings across these specialties:

TOTAL EYE

Our value-based eye care solution integrates **routine vision and medical-surgical benefits** in a single model, delivering **up to 30% savings**. It aligns provider incentives and sites of service, manages the spend on ocular injectables, improves HEDIS® outcomes, and offers members cost-effective access to frames and lenses.

SLEEP WELL

Our comprehensive sleep care model accelerates access to board-certified sleep specialists and streamlines diagnosis and treatment for the full range of sleep disorders. A modernized clinical model and value-based provider alignment **delivers treatment 5x faster at half the cost**, reducing downstream spend.

PURE DERM

Pure Derm delivers **up to 25% cost savings** through value-based provider reimbursement and clinical programs, and **\$10,000 per engaged member per year** on targeted specialty pharmacy management. Our solution reduces progression to advanced therapies and time to treatment, while improving the member experience.

THRIVE THERAPY

Our value-based therapy model is designed to improve functional outcomes by aligning providers, performance, and cost, delivering **up to 30% savings**. By standardizing therapy episodes and incentivizing providers, our model reduces variation, drives performance improvement, and creates predictable specialty spend across PT, OT, and ST.

Delivering on the Promise of Value-Based Care

Health Network One delivers on the promise of value-based specialty care by embedding clinical accountability, data-driven oversight, and aligned incentives. Our model rewards performance, not volume—so members, providers, and health plans all share in the same outcome: **better care at a sustainable cost.**

Value-Based Specialty Management Built for Scale

Health Network One is a leader in value-based specialty care, helping health plans control costs and improve outcomes for high-impact specialties. Our integrated provider networks and innovative clinical programs are designed to deliver up to 30% clinical and administrative savings while ensuring high-quality care.

Acting as a “health plan within a health plan,” we take full accountability for managing specialty services. Our value-based specialty solutions streamline operations, align incentives, and reduce administrative burden, resulting in predictable expenses and better member results.

Each specialty follows a disciplined, analytics-driven model led by clinical experts and guided by evidence-based care, improving quality, consistency, and lowering overall costs.

- **Aligned Incentives:** Step therapy, utilization management, right-site-of-care strategies, and value-based reimbursement
- **High-Performing Networks:** Curated and credentialed for quality, access, and member experience
- **Impact to Specialty Pharmacy Spend:** Programs tailored to reducing unnecessary use of costly medications
- **Flexible Risk Options:** Full-risk arrangements and shared savings with guaranteed ROI

One Partner, Complete Oversight

Health Network One assumes full delegated responsibility—from network development and utilization management to claims and quality reporting. Our NCQA-accredited, HITRUST-certified infrastructure ensures clinical integrity, transparency, and compliance at every step. We partner with providers, creating alignment that strengthens relationships, improves satisfaction, and drives measurable savings.
